Languages

- English
- Hindi
- Marathi

Profile

Aspiring .NET Developer with hands-on experience in building REST APIs, authentication modules, and CRUD applications using ASP.NET Core, ADO.NET, and Entity Framework. Strong foundation in C#, SQL, and object-oriented programming with the ability to learn and adapt quickly. Seeking an opportunity to contribute technical expertise in a dynamic software development team.

Work Experience (1 Year)

Yalamanchili Software Exports Nagpur

Software Developer

Dec 2024 – Jun 2025

Projects

1. User Authentication API (ASP.NET Core, MySQL, Postman)
- Designed and implemented signup, login, forgot password, and reset password modules
- Used Entity Framework Core with MySQL for data storage.
- Implemented password hashing using BCrypt.Net.
- Tested APIs with Postman and created documentation with Swagger.

2. Employee Management System (ASP.NET Core, ADO.NET,MySQL)
- Developed CRUD operations (Add, Update, Delete, View Employees).
- Followed Controller-Service-Repository architecture for code organization.
- Used ADO.NET (SqlConnection, SqlCommand, DataReader) for database interaction.
- ntegrated Swagger UI for endpoint testing.

Virtual galaxy infotech pvt. ltd

Software Support Engineer

Aug 2024 – Nov 2024

- Worked extensively with SQL databases for data retrieval and troubleshooting.
- Resolved client issues through ticketing systems like Helpdesk.
- Gained exposure to Java backend systems, sparking interest in backend development

Certification

Java full stack developer (Anudip Foundation)

Sep 2023 – Feb 2024

- Built full-stack apps using Java, Spring Boot, Hibernate
- Created frontend UIs with HTML, CSS, JS, Reac
- Designed and consumed REST APIs
- Practiced database integration using MySQL/PostgreSQL
- Used Git for version control in collaborative development

Projects

Maid Management System (Academic Project)
- Designed and implemented a system for managing domestic staff records, task assignments, and attendance.
- Included features such as user authentication, role-based access, and task scheduling.
- Used Spring Boot for backend logic and MySQL for data storage.
